[linkedin.com/in/tathy](https://www.linkedin.com/in/tathy) | [github.com/Tathy-Max](https://github.com/Tathy-Max)

## ABOUT ME

- *Stack: MERN (MongoDB, Express.js, React, Node.js, JavaScript, HTML & CSS)*
- *A fast learner and team player with excellent level of commitment and dedication*
- *High level of accuracy and attention to detail, exceptional organizational skills and ability in prioritizing demands*
- *Excel to solve problems and resolve conflicts, working independently showing an enthusiastic spirit, flexibility, and openness toward change*
- *Tech-savvy and bilingual in Portuguese (native) and English*

## WEB DEVELOPMENT PROJECTS

### SOC Brazil Week 2022 - The event

Oct 2022

<https://main.d3t11wju66tnxq.amplifyapp.com/>

**Description:** The project is a hot site created to support and capture registrations for the annual cybersecurity event of the SOC Brazil community.

**Highlights:** Single page application developed according to a figma design, providing information based on a json file.

**Stacks:** React.js, HTML, CSS. **Development time:** 5 days.

### Where to Go - The e-Commerce

Aug 2022

<https://wtg-ecommerce.netlify.app/>

**Description:** The project is an e-commerce in the travel service area, focused on those who are looking for an experience beyond the traditional packages (inspired by Guess Where Trips).

**Highlights:** Authentication and management of multiple profiles with different actions and pages for admins and users. The store's shopping-cart was built using the react-use-cart (a lightweight shopping cart hook). Also, the project included many full-CRUDS to manage users, trips, orders.

**Stacks:** React.js, Node.js, Express.js, MongoDB, AWS Server. **Development time:** 4 days.

### Catch your Cat - The App

Jul 2022

<https://catchyourcat.netlify.app/>

**Description:** Built as the second project of the Ironhack Full Stack Web Development Bootcamp, "Catch Your Cat" allows people to find out which cat breed is more suitable to their lifestyle and personal circumstances.

**Highlights:** Use of the external Cat Public API to retrieve all cats' breeds and their relevant information. The projects' APISearch component mainly dictates the logic of the matching process. All the User Interface has been developed (responsively for mobile and desktop) with React, and the project's CRUD schema is mainly based on the consumption of data (GET) from the Cat API (manipulating JSON files) and full-CRUD from/to a dedicated API which stores users' replies and results.

**Stacks:** React.js, REST API, CSS. **Development time:** 3 days.

### Guess the Song - The Game

Jun 2022

<https://tathy-max.github.io/game---guess-the-song/>

**Description:** The "Guess the Song" is a game built as the very first project of the Ironhack Full Stack Web Development Bootcamp. The game's goal is to guess the song's names throughout hints, reaching the end of the game's fourth round, holding the maximum score as possible.

**Highlights:** HTML, CSS, and Vanilla JavaScript to build the game without additional frameworks, and applying OOP concepts and DOM manipulation to make the game's interactions. For each round, functions and events are called to iterate through an array (.Json data file) that contains the information for all game's songs.

**Stacks:** HTML, CSS, JavaScript(ES6) (OOP and DOM manipulation). **Development time:** 3 days.

## EDUCATION & COURSES

- IronHack Bootcamp | Web Development Program 2022
- Business Human Resources | Fanshawe College | London, Canada 2020
- Veterinary Medicine | Estacio de Sa University | Rio de Janeiro, Brazil 2003

## WORK EXPERIENCE

**Full Stack Web Developer | IronHack Bootcamp - Web Development Program** 2022

Part of the bootcamp team that is a practical experience of web development. We worked with JavaScript using MERN stack (MongoDB, Express.js, React, and Node.js).

The curriculum focused on teaching programming best practices and agile methodologies, covering:

- Concepts such as OOP, how the Model-View-Controller design pattern works, types of web application (traditional web app and SPAs)
- HTML, CSS, Vanilla JavaScript to manipulate DOM (creating, updating and event handling)
- How to build a full stack app using MERN stack, creating a Node.js server running with Express.js, MongoDB storage and dynamic rendering, Mongoose, as well as AWS Server to deploy the projects
- How to make HTTP requests using Axios to integrate APIs in the applications
- Responsive web design, bootstrap, AntD, MUI, and Tailwind
- How to develop projects in pair programming collaborating with other colleagues and the UI/UX Team gaining hands-on experience of project version control using Git – GitHub
- How to use collaboration tools such as Figma, Notion, Slack, and Discord

## OTHER WORK EXPERIENCES

**Vet Tech Assistant | Staples Animal Hospital | London, Ontario - Canada** 2021 - 2022

- Operating the practice management software Covetrus Pulse (practice whiteboard, task dashboard, prescription management, and payment processing)
- Checking and updating data in patient's file for automatic generation of email marketing to notify upcoming appointments and vaccines
- Client communications discussing wellness plans, diagnosis, and treatment of illnesses and recover
- Assisting with appointments, reception duties, and animal caretaking

**Manufacturing Student Team Member | Toyota Boshoku | Woodstock, Ontario** 2020

- Performed quality control checks and ensured that product passes by machines in the proper condition
- Reported large or complex problems to team leader, supervisor, manager, or the maintenance team
- Performed inspection on product parts, ensuring product quality, and avoiding manufacturing delays
- Controlled computerized panels with indicators showing progress along the production line

**Sales & Operations Manager | Terra Viva Sustainable Uniforms | Rio de Janeiro, RJ - Brazil** 2009 - 2019

- Managing B2C and B2B clients
- Prospecting and acquiring new clients through cold calling and face-to-face meetings
- Performing the orientation/onboarding of new hirees, training and scheduling work hours of all employees
- Financial planning and budget management
- Physical and online store development and sales operation
- Production management involving over 20 different suppliers
- Inventory management distributed into 8 storages and more than 10000 pieces on total
